Frontend Developer

Web application developer. Reactj, Nextjs, Vanilla JavaScript. Alquiler Argentina, Real Trends (with MercadoLibre API), MRM//McCann (General Motors and Latam Airlines), etc. Django, Nodejs + Express, jQuery, Git. I am seeking a challenging role where I can leverage my extensive experience in web development using Reactjs, along with my proficiency in other related technologies such as Sass and Django. I aim to contribute to innovative projects in a dynamic environment while continuing to grow and expand my skill set.

Work Experience

Senior Software Engineer at Keyway

05/25 - Present

AI-powered real estate application with processed property data

- Develop and maintain a real estate web application using Next.js, Material UI, and TypeScript.
- Apply Clean Architecture principles, improving scalability, testability, and separation of concerns.
- Implement APIs and data workflows with tRPC to process and visualize property information.
- Build high-quality, reusable, and scalable UI components following Figma design guidelines.
- Design and orchestrate AI-driven development workflows using Cursor and Claude Code, including custom agents, skills, and plugins to automate development tasks.
- Integrate AI-assisted pipelines for code generation, validation, and review, improving development speed and code quality.
- Collaborate closely with Product and Design teams to transform business needs into user-friendly solutions.
- Research and adopt new frontend and AI technologies to improve performance and developer productivity.
- Apply agile methodologies to organize and deliver tasks efficiently.
- Manage code versioning and collaboration using Git.
- Configure and maintain GitHub Actions for CI/CD workflows, including automated builds, testing, AI-assisted checks, and deployments.

Main Technologies: Next.js, React, TypeScript, tRPC, Material-UI, Figma, Git, Design Patterns, SOLID, DRY.

Frontend Developer at Alquiler Argentina

05/24 - 05/25

Vacation rentals in Argentina

- Analyze requirements, specifications and input data and propose the best technical solution for a given business problem.
- Develop and maintain new projects and enhancements.
- Building high quality reusable code.
- Researching new technologies.

- Application of agile methods for the development of activities.
- Teamwork with the Product department.
- Code versioning with GIT.

Main Technologies: Reactjs, Nextjs, TypeScript, TailwindCSS, Git, Redux, Material-UI, Design Patterns, SOLID, DRY.

Senior Frontend Developer at Real Trends

11/21 - 02/24

Web platform to optimize sales in MercadoLibre

- Translate UI/UX Figma designs and wireframes into high-quality code, producing visual elements of the product.
- Develop and maintain all aspects of our web applications, ensuring high performance and seamless integration with our backend.
- Evaluate and leverage advanced JavaScript/Typescript libraries and frameworks.
- Build reusable code/components/libraries for future use.
- Participate in code reviews to maintain code quality and share knowledge.
- Use of server-side CSS preprocessing platforms, such as LESS and SASS.

Main Technologies: Reactjs, Vanilla JavaScript, SASS, Django, Git, Docker, SASS, RESTful API, Design Patterns.

Frontend Developer at Dos Al Cubo

11/19 - 10/21

CMS for independent news portals
